

Business and Government PARTNERING

for a thriving energy sector and inclusive economic growth

Eskom power station turnaround plan is delivering positive results

Business and households are investing in large scale own generation

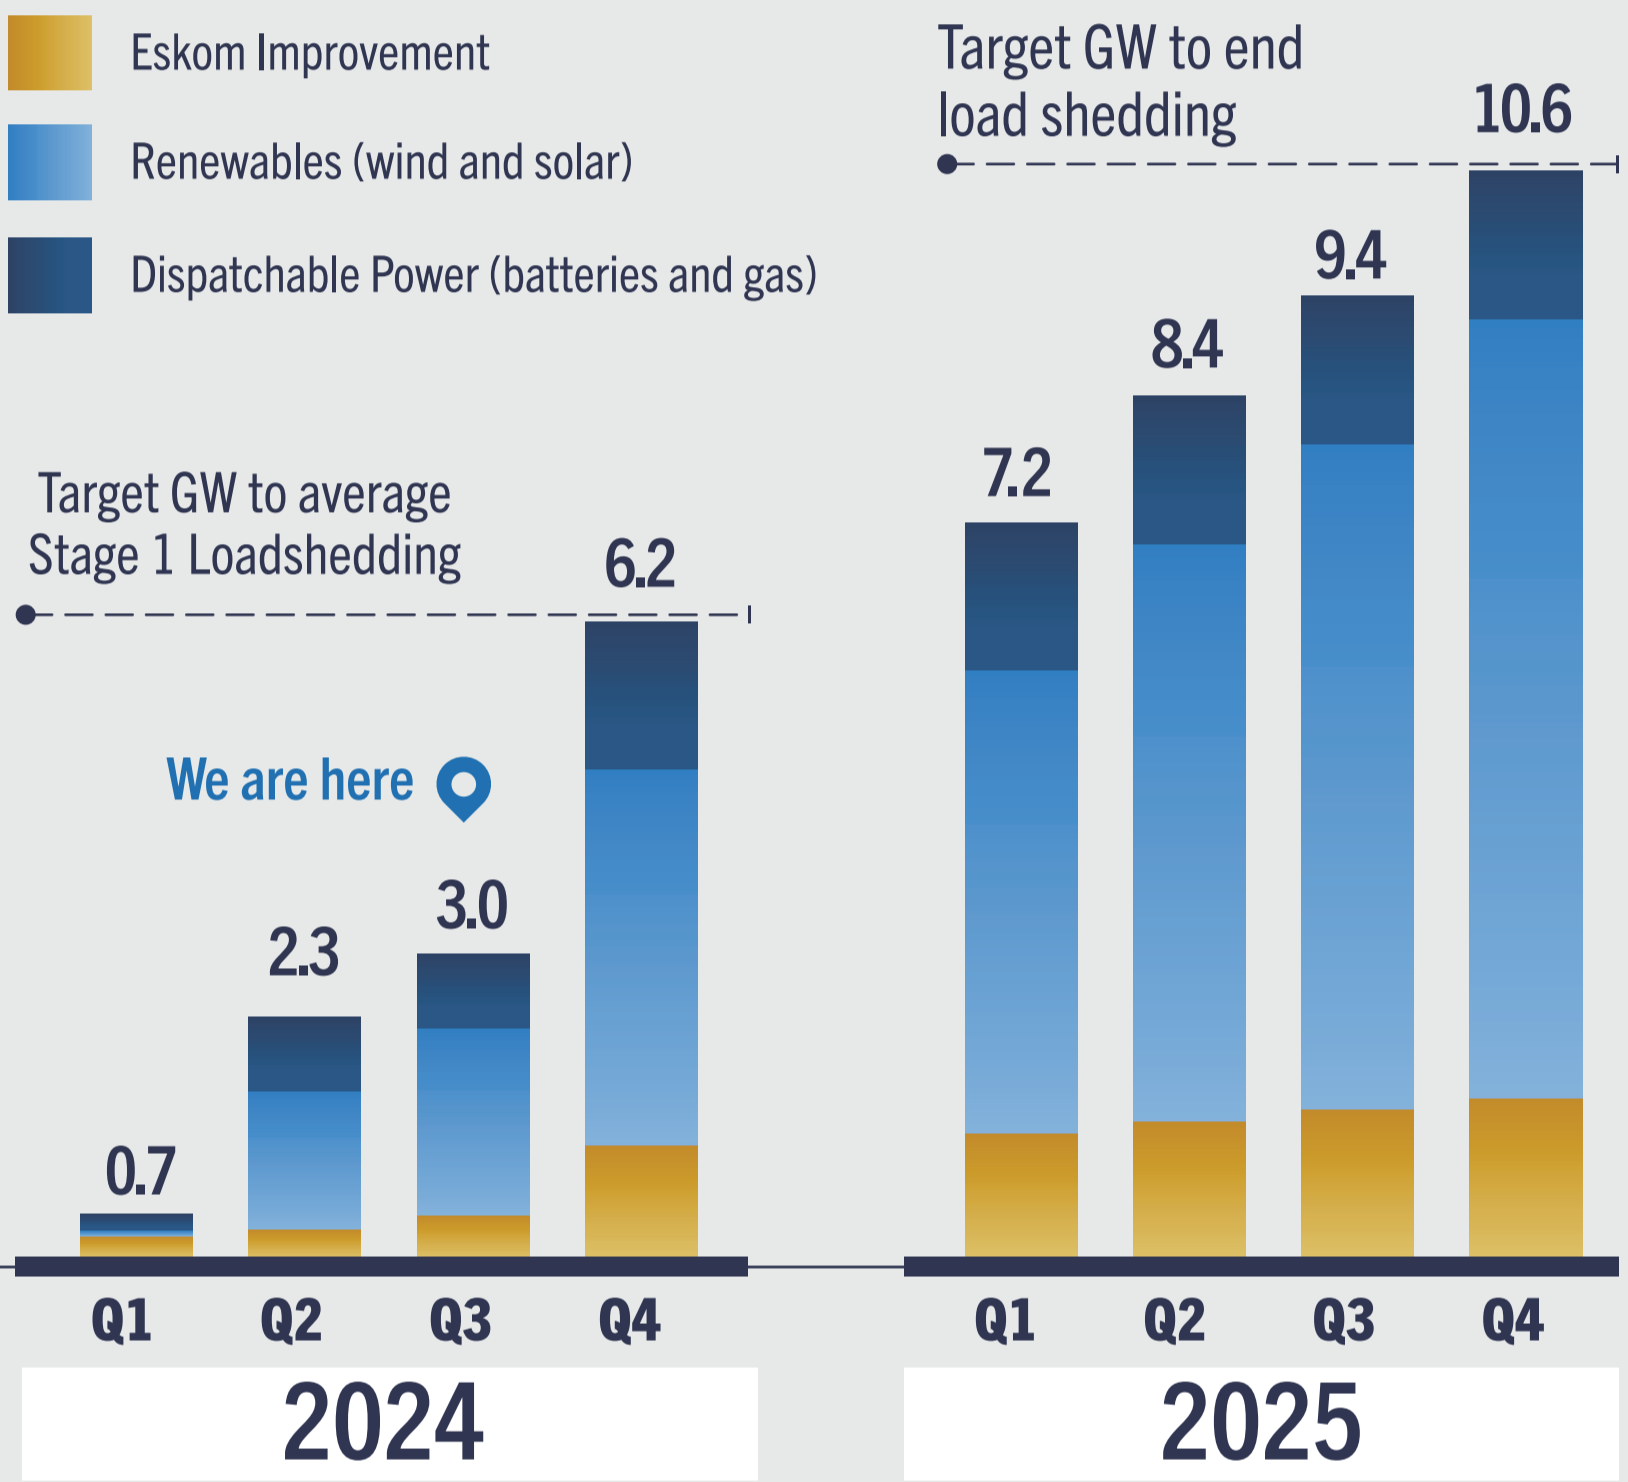

Targeted additional power to be added to the grid (GW)

CRITICAL PATH

to end loadshedding

We are ahead of the recovery plan

In June 2024, EAF tracking above 60% (versus 54% in 2023)

Expanding our ENERGY SOURCES

Eskom
Power Stations

3.5GW
Eskom capacity

recovered through NECOM interventions focused on **Eskom Plant, People and Processes**

Renewables
Wind & Solar

5.8GW
Rooftop solar

supported by **Government incentives**

Dispatchable
Batteries & Gas

4GW
Battery

powered generation being procured to **ensure energy security**
